

Day 18

User Interface Creation with Streamlit

Tasks Completed

1. Streamlit Page Structure:

- Added page title, layout configuration, and main UI setup.
- Displayed current question, answer input field, and evaluation section.

2. Sidebar Controls:

- Added dropdowns for selecting:
 - Job Role
 - Difficulty Level
 - Number of Questions
- These selections directly influence prompt generation.

3. UI Styling:

- Used clear headers, spacing, and formatting for readability.
- Focused on a simple, professional layout suitable for interview practice.

4. Linked Frontend With Backend:

- Connected `generate_question` to display the generated question.
- Added text area for users to type their answer.

Outcome

A clean, interactive interface was built to allow the user to smoothly engage with the AI model. The UI and backend now worked together as one complete system.
