

Day 19

Workflow Logic, Evaluation System & State Management

Tasks Completed

1. Session State Implementation:

- Stored:
 - Current question number
 - Total score
 - Generated questions
 - User answers
 - AI evaluations
- Ensured data remains consistent even when Streamlit reloads.

2. Answer Submission Workflow:

- Implemented logic to:
 - Validate answers
 - Trigger evaluation
 - Extract scores from AI-generated responses
 - Move to next question automatically

3. Final Summary Screen:

- Displayed:
 - Total score out of maximum
 - All questions
 - User answers
 - AI evaluations
- Added confetti animation (Streamlit balloons) when interview ends.

4. Error Handling & Edge Cases:

- Showed warnings if an answer was empty.
- Prevented duplicate question generation.

Outcome

A complete end-to-end workflow was successfully implemented, enabling users to complete interviews and receive detailed AI evaluations.
