

## Day 20

### Testing, Debugging, Enhancements & Documentation

#### Tasks Completed

##### 1. End-to-End Testing:

- Tested multiple roles: Full-stack developer, AI/ML engineer, DevOps engineer, etc.
- Validated difficulty variations (Easy/Medium/Hard).
- Ensured evaluation format remains consistent across all cases.

##### 2. Bug Fixes:

- Improved score extraction logic to handle formatting variations.
- Resolved missing evaluations in session state.
- Ensured smooth navigation to next question.

##### 3. UI Enhancements:

- Organized summary layout.
- Improved text formatting for clarity.
- Increased evaluation text area height for comfort.

##### 4. Documentation Preparation:

- Wrote results section headings (you add images later).
- Added explanation of how prompt engineering supports the project.
- Finalized project workflow diagram and summary.

#### Outcome

The project became polished, user-friendly, and presentation-ready with accurate evaluation logic and a clean UI.
